INNOVATIVE PACKAGING FOR MODERN BUSINESSES

In today's interconnected world, packaging has evolved beyond its traditional role as a mere container, becoming an essential part of modern life. It protects, preserves, and presents the products we rely on daily, ensuring their safe transportation and maintaining their quality. The industry has seen remarkable advancements in materials science, printing technology, and sustainability, transforming how products are packaged and perceived. Modern solutions safeguard goods from damage, spoilage, and contamination, ensuring they reach consumers in optimal condition. Additionally, well-designed packaging enhances brand image, provides essential information, and influences purchasing decisions, making it a crucial element of the consumer experience.

**PERFECT
CARTONS**

Having been in this industry for the longest time under the name Western Polyflex, we have now rebranded as Perfect Cartons. While our name has changed, our commitment to quality remains unwavering. As an ISO 9001, 14001, and 45001 certified company, our products and services continue to meet the highest standards. We remain dedicated to delivering innovative packaging solutions that meet the evolving needs of the industry.

PERFECT CARTONS

PERFECTING PACKAGING SOLUTIONS

Located in Cherthala, Alappuzha, Perfect Cartons is a leader in flexible packaging innovation. Our advanced 35,000 sq. ft. facility is equipped with state-of-the-art technology, producing durable and sustainable packaging solutions tailored to diverse industries.

We collaborate closely with clients to develop customised packaging that aligns with their brand identity and functional requirements. Committed to precision, sustainability, and customer satisfaction, Perfect Cartons aims to be the preferred partner for all flexible packaging needs.

A WIDE

INDUSTRY SPECIFIC SOLUTIONS

Superior packaging solutions that excel in quality, strength, safety and performance. Protecting products from external elements is at the core of our flexible packaging solutions, ensuring optimal preservation and durability.

OUR OFFERINGS

- ◆ MONOLAYER FILMS
- ◆ MULTILAYER CO-EXTRUDED FILMS
- ◆ PRINTED LAMINATED POUCHES
- ◆ COLLATION SHRINK FILMS
- ◆ AGRICULTURAL FILMS
- ◆ LAMINATION FILMS
- ◆ GENERAL PURPOSE FILMS

WIDELY USED ACROSS VARIOUS SECTORS

| FOOD & BEVERAGES | SPICES | CONFECTIONERY | DAIRY
| AGRICULTURE | PHARMACEUTICALS | PERSONAL & HOME CARE
| COSMETICS

RANGE OF SOLUTIONS

STATE-OF-THE-ART MANUFACTURING

Perfect Cartons integrates advanced technology and precision engineering to ensure superior packaging solutions

2200 MM LAYFLAT WIDTH MULTI-LAYER CO-EXTRUDED BLOWN FILM LINE

Our advanced multi-configuration blown film line delivers a diverse range of high-performance films, engineered for various industrial applications:

- ◆ GREENHOUSE & AGRICULTURAL FILMS
- ◆ LAMINATION FILMS
- ◆ LIQUID PACKAGING FILMS
- ◆ MEAT & CEREAL FILMS
- ◆ OIL PACKAGING FILMS
- ◆ PHARMA & MEDICAL FILMS
- ◆ PALLET HOODING FILMS

LIGHT BOOTH

Enables precise colour evaluation, minimising revisions by detecting inconsistencies, metameric effects, and optical brightener impact. By replicating various lighting conditions—daylight (D50, D65), tungsten, fluorescent, and LED—they ensure products appear consistent in retail and real-world settings. Compliant with international standards like ASTM, DIN, and ISO, light booths enhance quality control and product reliability.

HIGH-SPEED ROTOGRAVURE PRINTING MACHINE

Our advanced 8-colour high-speed rotogravure printing machine, equipped with auto-registration and turret technology, ensures precision and efficiency. Featuring two-sided printing capability, it delivers exceptional flexibility, vibrant high-resolution colour combinations, and accelerated production speeds for superior packaging quality.

LAMINATING

SOLVENT-LESS LAMINATION

Our solvent-free lamination technology ensures strong, high-quality laminates with superior barrier properties for optimal product protection. Utilising a two-component adhesive system and advanced five-roller coating technology, we achieve minimal adhesive usage while maintaining exceptional bonding strength and durability.

ADVANCED SLITTING TECHNOLOGY

Our precision slitting technology guarantees uniform product dimensions, reduces material waste, and optimises production efficiency. Designed for versatility, our high-performance slitting machine efficiently processes a wide range of materials, including cellophane, PET, OPP, CPP, PE, PVC, paper rolls, and printed films of various thicknesses and widths.

POUCHING MACHINE

This advanced machine efficiently converts lay-flat laminated films, such as PET-PE and BOPP-PE, into different sized pouches with various attachments. Designed for high-speed operation and precision, it is controlled by microprocessors to ensure optimal accuracy and performance.

UNCOMPROMISING QUALITY ASSURANCE

Our commitment to quality assurance is reflected in every step of the process. Through thorough quality checks and advanced testing, we ensure our packaging meets the highest standards of durability and performance. With precision and attention to detail, we deliver reliable, protective solutions for every product.

FRICTION TESTER

Evaluates the ease of opening and dispensing packaging, ensuring a smooth user experience. This quality check ensures that every package is both functional and user-friendly.

DIGITAL OPACITY TESTER

Measures the transparency of packaging materials, ensuring consistent quality. It evaluates how light passes through the material, ensuring optimal protection for products. This tool maintains the desired opacity standards for packaging.

HEAT SEALER

Ensures strong, secure seals on packaging, preventing leaks and contamination. It guarantees the integrity of the packaging, maintaining product safety and freshness.

TENSILE, ELONGATION, SEAL STRENGTH & BOND STRENGTH TEST

Assess the durability and performance of packaging materials. These tests ensure the materials can withstand stretching, sealing, and bonding under various conditions, guaranteeing reliable protection and functionality.

OVEN

Tests packaging material's resistance to high temperatures, ensuring durability under heat. It helps verify the material's strength and performance in extreme conditions.

IMPACT TESTER

Valuates packaging durability by simulating real-world shipping conditions. It ensures the material can withstand sudden impacts, protecting products from damage during transit.

WEIGHING SCALE

Ensures precise measurement of packaging weight, maintaining consistency and compliance with industry standards. It helps optimise material usage and packaging efficiency.

SUSTAINABILITY & SOCIAL RESPONSIBILITY

Perfect Cartons is committed to eco-conscious packaging solutions and sustainable business practices:

WASTE REDUCTION

Utilising efficient processes and recyclable materials to minimise waste.

ENVIRONMENTAL STEWARDSHIP

Implementing responsible waste management and energy conservation initiatives.

COMMUNITY ENGAGEMENT

Supporting local sustainability and social initiatives.
